

Solimar® Print Director™ Enterprise (SPDE)

ASCII::3211 Conversion Module

Overview

The ASCII::3211 module converts ASCII text files into 3211 format for printing on BUS/TAG channel attached printers. Unix and personal computers typically generate ASCII files for financial statements, catalogs, listings, and other reports for printing on inexpensive impact and non-impact printers. ASCII controls placement of text with a simple series of carriage control commands. This module can convert both the carriage control and code page of ASCII data into new formats.

The ASCII::3211 emulation module converts ASCII data into variable records containing 3211 carriage control and translates the data between ASCII and EBCDIC code pages.

Technical Specifications

- Converts ASCII carriage control into IBM 3211
- Translates ASCII character set into EBCDIC Code Page 37 character set
- Translates ASCII characters into Xerox extended EBCDIC character set

Component

- ASCII::3211 module
- Included with Base System

Solimar® Print Director™ Enterprise (SPDE)

Enterprise Output Management Solution

The Solimar Print Director Enterprise is a client-server-based enterprise output management solution designed to improve the performance of production output processes and optimize management control.

Utilizing advanced technology, Solimar Print Director Enterprise combines multi-level security, remote administrator and operator access, event logging and notification, direct device connectivity capabilities, powerful job routing and tracking with industry-leading data stream transformations.

About Solimar Systems, Inc.

Founded in 1991, Solimar Systems, Inc. is a leading developer of enterprise output management solutions for digital document creation, production and distribution. Installed in thousands of sites around the world, including nearly 50% of the Fortune 100, Solimar solutions satisfy a wide range of requirements by combining integrated connectivity, data stream transforms and optimizations, document re-engineering/repurposing and sophisticated print queue management with secure web-based document presentment, distribution and tracking.

Experts in legacy and modern data streams, Solimar solutions provide essential infrastructure to a variety of industries including insurance, financial services, banking, pharmaceutical, telecommunications, healthcare, government, education, retail, manufacturing, utilities, distribution and print service bureaus.
