

Solimar® Print Director™ Enterprise (SPDE)

Blocker Utility Module

Overview

The Blocker module converts data between different blocking formats. The module provides the flexibility to process computer data that is stored, moved, and copied in a variety of formats. The format in which data is stored can vary from application to application, and from computer to computer. The Blocker module supports virtually all applications generated from host systems.

Supported input and output data formats:

- Channel command word (CCW)
- Variable block record (VBR)
- Variable record (VLR)
- Stream (no carriage control)
- Fixed record (FLR)
- BARR format
- Twinax data (SCS)
- Spur format
- EBCDIC
- ASCII
- Burroughs 6700 (Input only)
- Xerox EPS
- AWS tape
- User-defined (custom formats)

Technical Specifications

- Converts carriage control between ANSI-ASCII, ANSI-EBCDIC and IBM 3211
- Converts to and from EBCDIC, ASCII and Xerox EBCDIC and Xerox ASCII
- Re-blocks data for offline printing via SCSI DDI or tape
- Re-blocks data for passing-through mainframes
- Splits large metacode graphic records to enable SCSI DDI support
- Specification of Spur transparency codes to support all models of 3211 emulation Spur devices
- User-defined record & block options to support virtually any data structure as an input or output
- Reblocks data for Xerox EPS

Component

- Blocker module
 - Included with Base System

Solimar® Print Director™ Enterprise (SPDE)

Enterprise Output Management Solution

The Solimar Print Director Enterprise is a client-server-based enterprise output management solution designed to improve the performance of production output processes and optimize management control.

Utilizing advanced technology, Solimar Print Director Enterprise combines multi-level security, remote administrator and operator access, event logging and notification, direct device connectivity capabilities, powerful job routing and tracking with industry-leading data stream transformations.

About Solimar Systems, Inc.

Founded in 1991, Solimar Systems, Inc. is a leading developer of enterprise output management solutions for digital document creation, production and distribution. Installed in thousands of sites around the world, including nearly 50% of the Fortune 100, Solimar solutions satisfy a wide range of requirements by combining integrated connectivity, data stream transforms and optimizations, document re-engineering/repurposing and sophisticated print queue management with secure web-based document presentment, distribution and tracking.

Experts in legacy and modern data streams, Solimar solutions provide essential infrastructure to a variety of industries including insurance, financial services, banking, pharmaceutical, telecommunications, healthcare, government, education, retail, manufacturing, utilities, distribution and print service bureaus.
