

# Solimar® Print Director™ Enterprise (SPDE)

## BUS/TAG Output Connectivity Module

### Overview

The BUS/TAG channel output module directly drives multiple Xerox LPS and 3211 line printers via online channel. Used in conjunction with other input and emulation modules, network data can be routed to the Solimar print server and converted into Metacode and 3211 for printing onto high-speed production printers.

### Technical Specifications

- Supports up to eight daisy-chained printers
- Supports up to four BUS/TAG output connections per print server
- Uses Solimar’s high-speed 32-bit PCI adapter channel card
- Supports variable record format as input
- Supports all printers that utilizes the 3211 protocol
- Fully integrated BUS/TAG channel connectivity and communications
- Easy upgrade from protocol converter boxes or DOS systems
- BUS/TAG and SCSI outputs can operate in the same print server
- Supports subtle channel protocol differences between printer manufacturers
- Supports separating reports by forcing a form feed at the end of each job

### Components

- BUS/TAG output module communication software
- Solimar BUS/TAG hardware:
  - PCI 32-bit BUS/TAG channel adapter
  - 25-foot cable
  - Terminators
  - Xerox JSLs

## Solimar® Print Director™ Enterprise (SPDE)

### Enterprise Output Management Solution

The Solimar Print Director Enterprise is a client-server-based enterprise output management solution designed to improve the performance of production output processes and optimize management control.

Utilizing advanced technology, Solimar Print Director Enterprise combines multi-level security, remote administrator and operator access, event logging and notification, direct device connectivity capabilities, powerful job routing and tracking with industry-leading data stream transformations.

### About Solimar Systems, Inc.

Founded in 1991, Solimar Systems, Inc. is a leading developer of enterprise output management solutions for digital document creation, production and distribution. Installed in thousands of sites around the world, including nearly 50% of the Fortune 100, Solimar solutions satisfy a wide range of requirements by combining integrated connectivity, data stream transforms and optimizations, document re-engineering/repurposing and sophisticated print queue management with secure web-based document presentment, distribution and tracking.

Experts in legacy and modern data streams, Solimar solutions provide essential infrastructure to a variety of industries including insurance, financial services, banking, pharmaceutical, telecommunications, healthcare, government, education, retail, manufacturing, utilities, distribution and print service bureaus.
