

# Solimar® Print Director™ Enterprise (SPDE)

## Data Converter Utility Module

### Overview

The Data Converter module converts characters or strings of characters in the print stream. The module modifies print jobs at run time, adds signatures, makes data unprintable, or corrects coding errors.

The power of the Data Converter lies in the fact that it can change print jobs at run time. Problem print streams can be corrected and images or forms can be added to a print job by invoking macros or Xerox DJDEs. Data can be modified to support vendor specific print commands. Because the user defines the operation of this module, it is extremely flexible and powerful.

The Data Converter module is configured by specifying user-defined input and output strings. The module scans the data for the input string and when found replaces it with the associated output string.

### Technical Specifications

- Search and replace any data string for any other data string
- Supports binary data
- Append or insert any data strings into a file

### Component

- Data Converter module
- Included with Base System

## Solimar® Print Director™ Enterprise (SPDE)

### Enterprise Output Management Solution

The Solimar Print Director Enterprise is a client-server-based enterprise output management solution designed to improve the performance of production output processes and optimize management control.

Utilizing advanced technology, Solimar Print Director Enterprise combines multi-level security, remote administrator and operator access, event logging and notification, direct device connectivity capabilities, powerful job routing and tracking with industry-leading data stream transformations.

### About Solimar Systems, Inc.

Founded in 1991, Solimar Systems, Inc. is a leading developer of enterprise output management solutions for digital document creation, production and distribution. Installed in thousands of sites around the world, including nearly 50% of the Fortune 100, Solimar solutions satisfy a wide range of requirements by combining integrated connectivity, data stream transforms and optimizations, document re-engineering/repurposing and sophisticated print queue management with secure web-based document presentment, distribution and tracking.

Experts in legacy and modern data streams, Solimar solutions provide essential infrastructure to a variety of industries including insurance, financial services, banking, pharmaceutical, telecommunications, healthcare, government, education, retail, manufacturing, utilities, distribution and print service bureaus.
