

## Solimar® Print Director™ Enterprise (SPDE)

### File Inserter Utility Module

#### Overview

The File Inserter module allows users to insert one file at the beginning or end of a job. This can be useful for inserting DJDEs, form calls, JDE calls, invoking macros, banner page insertion, and many other situations that require data to be added to the beginning or end of a job.

This module uses a priority list of file insertion rules. Each rule consists of a description, the file to insert, location of insertion, and a list of conditions. Multiple conditions related to the job's properties can be entered for each rule. These conditions are tested against the properties at the beginning or end of the job. The file will be inserted when the conditions are true, or if no conditions are defined.

The File Inserter module inserts one file at the beginning or end of a job as it is processed. The file to be inserted is determined by matching job name attributes with user-defined conditions. This can be useful for inserting DJDEs, form calls, JDE calls, invoking macros, banner page insertion, and many other situations that require data to be added to the beginning or end of a job.

#### Technical Specifications

- Inserts files to the beginning or end of data on-the-fly
- Qualifies user-defined filters for file insertion specification
- Automates JDL and JDE selection
- Inserts PostScript and VIPP® codes dynamically to print files
- Automates form overlay selection
- Inserts banner pages

#### Component

- File Inserter module
- Included with Base System

## Solimar® Print Director™ Enterprise (SPDE)

### Enterprise Output Management Solution

The Solimar Print Director Enterprise is a client-server-based enterprise output management solution designed to improve the performance of production output processes and optimize management control.

Utilizing advanced technology, Solimar Print Director Enterprise combines multi-level security, remote administrator and operator access, event logging and notification, direct device connectivity capabilities, powerful job routing and tracking with industry-leading data stream transformations.

### About Solimar Systems, Inc.

Founded in 1991, Solimar Systems, Inc. is a leading developer of enterprise output management solutions for digital document creation, production and distribution. Installed in thousands of sites around the world, including nearly 50% of the Fortune 100, Solimar solutions satisfy a wide range of requirements by combining integrated connectivity, data stream transforms and optimizations, document re-engineering/repurposing and sophisticated print queue management with secure web-based document presentment, distribution and tracking.

Experts in legacy and modern data streams, Solimar solutions provide essential infrastructure to a variety of industries including insurance, financial services, banking, pharmaceutical, telecommunications, healthcare, government, education, retail, manufacturing, utilities, distribution and print service bureaus.
