

Solimar® Print Director™ Enterprise (SPDE)

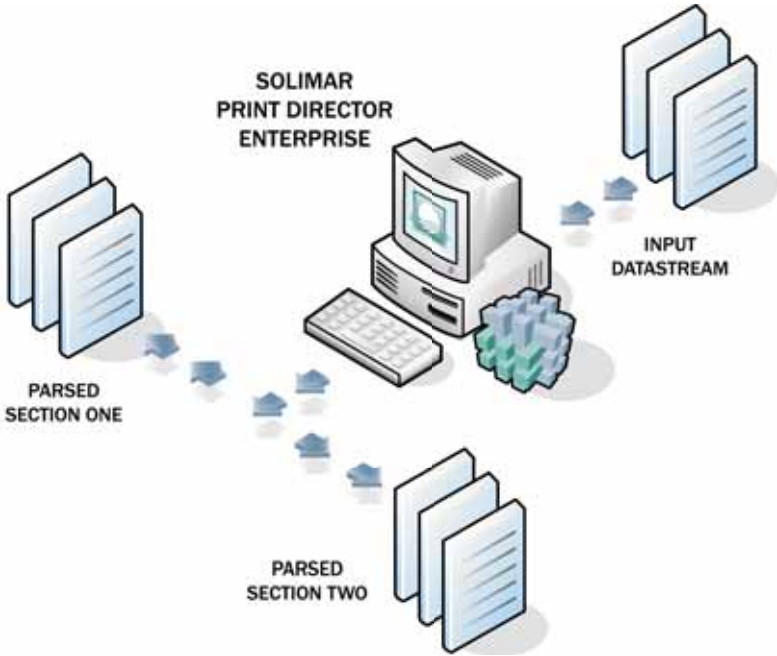

Job Separator Utility Module

Overview

The Job Separator module processes files by reading the data for job routing and control information provided. The module can parse input files and extract job names and other details so that reports can be routed and processed automatically under program control. Page range reprints with PostScript files is also enabled with the Job Separator.

The Job Separator module uses a user-defined set of rules or key file to scan data. When a rule is matched the module can delete the page or parse the data and extract job names and other report details. This enables reports to be routed and processed automatically under program control.

Technical Specifications

- Extracts information from data for file naming and routing
- Parses files based on page count
- Separates files based on information contained on any page within the data
- Enables load balancing among multiple devices of separated files
- Deletes specified pages from data
- Parses files on OTEXT message content
- Can count pages of input files for accounting and operator processing
- Converts between Xerox NPS and DocuSP PostScript formats
- Supports page range reprints from DSC compliant PostScript files

Component

- Job Separator module
 - Included with Base System

Solimar® Print Director™ Enterprise (SPDE)

Enterprise Output Management Solution

The Solimar Print Director Enterprise is a client-server-based enterprise output management solution designed to improve the performance of production output processes and optimize management control.

Utilizing advanced technology, Solimar Print Director Enterprise combines multi-level security, remote administrator and operator access, event logging and notification, direct device connectivity capabilities, powerful job routing and tracking with industry-leading data stream transformations.

About Solimar Systems, Inc.

Founded in 1991, Solimar Systems, Inc. is a leading developer of enterprise output management solutions for digital document creation, production and distribution. Installed in thousands of sites around the world, including nearly 50% of the Fortune 100, Solimar solutions satisfy a wide range of requirements by combining integrated connectivity, data stream transforms and optimizations, document re-engineering/repurposing and sophisticated print queue management with secure web-based document presentment, distribution and tracking.

Experts in legacy and modern data streams, Solimar solutions provide essential infrastructure to a variety of industries including insurance, financial services, banking, pharmaceutical, telecommunications, healthcare, government, education, retail, manufacturing, utilities, distribution and print service bureaus.
