

## Solimar® Print Director™ Enterprise (SPDE)

### Tape Input Connectivity Module

#### Overview

The Tape Input module offers a convenient way to print IBM AFP, Xerox LCDS/Metacode, or other PDL formatted jobs stored on tape for processing by SPDE. Printing via tape input allows jobs to be submitted from systems that are not directly connected to the SPDE system or from print files that have been stored for backup purposes. The tape data is received from the tape device over a SCSI connection to the SPDE computer. Once the data is on the PC, you can take advantage of SPDE's print stream conversions and powerful job management capabilities to modify and route the data to meet your printing and archiving requirements. The Tape Input module can also be used to replicate a Xerox LPS offline printing environment.

#### Technical Specifications

- Provides offline Xerox LPS tape input emulation
- Provides offline IBM AFP data transfer
- Directly controls SCSI-2 tape drives
- Supports reading tape header labels for file naming information
- Supports pre and post tape positioning
- Supports blocking data to VLR output format
- Supports Auto-Loader tape drives
- Supports up to four tape devices on a single system
- Supports 3480/3490E compatible 18/36 track drives
- Supports 9-track compatible drives
- Supports 1/4 QIC tape drives
- Supports 8 mm tape
- Supports browsing tape data with the tape viewer utility

#### Components

- Tape Input module
- SCSI adapter card
- Tape viewer utility

## Solimar® Print Director™ Enterprise (SPDE)

### Enterprise Output Management Solution

The Solimar Print Director Enterprise is a client-server-based enterprise output management solution designed to improve the performance of production output processes and optimize management control.

Utilizing advanced technology, Solimar Print Director Enterprise combines multi-level security, remote administrator and operator access, event logging and notification, direct device connectivity capabilities, powerful job routing and tracking with industry-leading data stream transformations.

### About Solimar Systems, Inc.

Founded in 1991, Solimar Systems, Inc. is a leading developer of enterprise output management solutions for digital document creation, production and distribution. Installed in thousands of sites around the world, including nearly 40% of the Fortune 100, Solimar solutions satisfy a wide range of requirements by combining integrated connectivity, data stream transforms and optimizations, document re-engineering/repurposing and sophisticated print queue management with secure web-based document presentation, distribution and tracking.

Experts in legacy and modern data streams, Solimar solutions provide essential infrastructure to a variety of industries including insurance, financial services, banking, pharmaceutical, telecommunications, healthcare, government, education, retail, manufacturing, utilities, distribution and print service bureaus.
