

Solimar® Print Director™ Enterprise (SPDE)

Trash Can Utility Module

Overview

The Trash Can module processes data without creating an output file. This Base System component is commonly used with other modules for page counting, creating printer resources, and temporary files. The Trash Can is key to many print queue management features, including drag-and-drop and timed deletion of print job configurations.

The Trash Can module does not have any options to configure. The module processes jobs without creating output. It is commonly used as an easy reference for previewing the number of pages in a job.

Technical Specifications

- Processes data without creating an output file
- Provides rapid page counting of files without generating data
- Used with emulation modules for testing conversion speeds and file processing
- Used with File Queuer’s timed release for automatic file deletion
- Used with File Queuer to drag-and-drop configurations to display queue windows
- Used with emulation modules to create resources when an output file is not required

Component

- Trash Can module
- Included with Base System

Solimar® Print Director™ Enterprise (SPDE)

Enterprise Output Management Solution

The Solimar Print Director Enterprise is a client-server-based enterprise output management solution designed to improve the performance of production output processes and optimize management control.

Utilizing advanced technology, Solimar Print Director Enterprise combines multi-level security, remote administrator and operator access, event logging and notification, direct device connectivity capabilities, powerful job routing and tracking with industry-leading data stream transformations.

About Solimar Systems, Inc.

Founded in 1991, Solimar Systems, Inc. is a leading developer of enterprise output management solutions for digital document creation, production and distribution. Installed in thousands of sites around the world, including nearly 40% of the Fortune 100, Solimar solutions satisfy a wide range of requirements by combining integrated connectivity, data stream transforms and optimizations, document re-engineering/repurposing and sophisticated print queue management with secure web-based document presentation, distribution and tracking.

Experts in legacy and modern data streams, Solimar solutions provide essential infrastructure to a variety of industries including insurance, financial services, banking, pharmaceutical, telecommunications, healthcare, government, education, retail, manufacturing, utilities, distribution and print service bureaus.
