

Solimar® Print Director™ Enterprise (SPDE)

Windows® Printer Spooler Connectivity Module

Overview

The Windows® Printer Spooler module spools data directly to Windows® printers or output devices without using the printer driver. Since SPDE can output data in many different printer languages, this module sends the raw data to Windows® printer driver definitions and Windows® Port Monitor. This module is used to communicate with or send data to generic Windows® devices that only support custom port definitions such as COM or HPIB. Spooling directly to Windows® drivers also supports sending output data via LPR, file, LPT, and Novell®.

Technical Specifications

- Sends raw output to printers or device drivers through printer definitions
- Passes job name information to driver
- Specifies output device using Windows® 2000/NT printer definitions

Component

- Windows® Printer Spooler module

Solimar® Print Director™ Enterprise (SPDE)

Enterprise Output Management Solution

The Solimar Print Director Enterprise is a client-server-based enterprise output management solution designed to improve the performance of production output processes and optimize management control.

Utilizing advanced technology, Solimar Print Director Enterprise combines multi-level security, remote administrator and operator access, event logging and notification, direct device connectivity capabilities, powerful job routing and tracking with industry-leading data stream transformations.

About Solimar Systems, Inc.

Founded in 1991, Solimar Systems, Inc. is a leading developer of enterprise output management solutions for digital document creation, production and distribution. Installed in thousands of sites around the world, including nearly 40% of the Fortune 100, Solimar solutions satisfy a wide range of requirements by combining integrated connectivity, data stream transforms and optimizations, document re-engineering/repurposing and sophisticated print queue management with secure web-based document presentation, distribution and tracking.

Experts in legacy and modern data streams, Solimar solutions provide essential infrastructure to a variety of industries including insurance, financial services, banking, pharmaceutical, telecommunications, healthcare, government, education, retail, manufacturing, utilities, distribution and print service bureaus.
