

# Solimar® Print Director™ Enterprise (SPDE)

## XCHANGE Conversion Modules

### Overview

The XCHANGE modules convert mainframe and Xerox LCDS/Metacode applications, reaching 30,000+ pager per minute, for distribution to printers that support PostScript, PCL, IPDS, and PDF viewing stations. These modules can be used in conjunction with the PostScript::TIFF module for output to TIFF-based archive systems.

### Technical Specifications

- Supports incoming file formats: 3211, 3262, 4245, 4248, 6262
- Supports all LPS printer apps: DJDE/LCDS, Metacode, ASCII, EBCDIC
- Emulates Xerox LPS Metacode printers in channel and tape modes & IBM line printers
- Supports Xerox FNT, FRM, IMG, LGO, PDE, CME, JDL, and JSLs
- Supports Xerox resources with FILE=( ) and batch and page or disk-interleaved graphics
- Converts print data and resources dynamically without coding or reprogramming
- Automated or operator prompted START Command control
- Resource management with or without file conversion
- Supports multiple sets of resource directories and supports prioritizing duplicate resource versions
- Options to log all resources used during processing
- Displays ITEXT messages in SPDE operator message window
- Supports HOSTCOPY and NTO1 processing
- Supports selective report processing for offline jobs
- Supports copy sensitive OTEXT, feed drawer, FORM, and ROUTE pages
- Integrates LPS features for new target printers:
  - Edge-to-edge printing
  - Color output
  - Copy-sensitive tray selection
  - Six feed drawers & paper jogging
  - High resolution resources for devices
  - Custom fill patterns
  - Subset finishing
  - Fine adjust line draw (for 600 dpi printers)
  - Setpagedevice & No Setpagedevice for PS printers
  - Downloads fonts and forms to printers in new PDL
  - Displays OTEXT messages on new target printer
  - LPS Printer OS & Patch emulation
  - Custom settings for different destination printers
  - Enables or removes PJJ processing

### Components

- XCHANGE::IPDS module
- XCHANGE::Metacode module
- XCHANGE::PCL module
- XCHANGE::PDF module
- XCHANGE::PostScript module
- Solimar JSL and FSL compiler
- Modules are licensed separately

## Solimar® Print Director™ Enterprise (SPDE)

### Enterprise Output Management Solution

The Solimar Print Director Enterprise is a client-server-based enterprise output management solution designed to improve the performance of production output processes and optimize management control.

Utilizing advanced technology, Solimar Print Director Enterprise combines multi-level security, remote administrator and operator access, event logging and notification, direct device connectivity capabilities, powerful job routing and tracking with industry-leading data stream transformations.

### About Solimar Systems, Inc.

Founded in 1991, Solimar Systems, Inc. is a leading developer of enterprise output management solutions for digital document creation, production and distribution. Installed in thousands of sites around the world, including nearly 40% of the Fortune 100, Solimar solutions satisfy a wide range of requirements by combining integrated connectivity, data stream transforms and optimizations, document re-engineering/repurposing and sophisticated print queue management with secure web-based document presentation, distribution and tracking.

Experts in legacy and modern data streams, Solimar solutions provide essential infrastructure to a variety of industries including insurance, financial services, banking, pharmaceutical, telecommunications, healthcare, government, education, retail, manufacturing, utilities, distribution and print service bureaus.
