

Solimar® Print Director™ Enterprise (SPDE)

XCHANGE::PCL Conversion Module

Overview

The XCHANGE::PCL module converts mainframe and Xerox LCDS/Metacode applications, reaching 30,000+ pager per minute, into PCL for distribution to workgroup and production printers. Data streams and resources are converted in real-time into PCL specifically optimized for the output device.

Technical Specifications

- Emulates Xerox LPS Metacode printers in channel and tape modes & IBM line printers
- Supports Xerox FNT, FRM, IMG, LGO, PDE, CME, JDL, STK, IDR and JSLs
- Supports Xerox resources with FILE=() and batch and page-interleaved graphics
- Converts print data and resources dynamically without coding or reprogramming
- Outputs PCL 4, 5, 5C, 5E
- Enables or removes PJJ processing
- Logs all resources used during processing
- Stores fonts and forms on printer hard drive to increase performance and reduce the PCL file size
- Displays ITEXT messages in SPDE
- Supports HOSTCOPY & NT01 processing
- Supports selective report processing for offline jobs
- Supports copy sensitive feed drawer output
- Displays OTEXT messages on new target printer using PJJ commands
- Printer OS version and patch emulation
- Supported formats: ASCII, EBCDIC, 3211, 3262, 4245, 4248, 6262, Xerox DJDE/LCDS/Metacode
- Integrates LPS features for new target printers:
 - Edge-to-edge printing
 - Color output
 - Custom fill patterns
 - Six feed drawers and paper jogging
 - Fine adjust line draw(600 dpi printers)

Components

- XCHANGE::PCL module
- Solimar JSL and FSL compiler

Solimar® Print Director™ Enterprise (SPDE)

Enterprise Output Management Solution

The Solimar Print Director Enterprise is a client-server-based enterprise output management solution designed to improve the performance of production output processes and optimize management control.

Utilizing advanced technology, Solimar Print Director Enterprise combines multi-level security, remote administrator and operator access, event logging and notification, direct device connectivity capabilities, powerful job routing and tracking with industry-leading data stream transformations.

About Solimar Systems, Inc.

Founded in 1991, Solimar Systems, Inc. is a leading developer of enterprise output management solutions for digital document creation, production and distribution. Installed in thousands of sites around the world, including nearly 50% of the Fortune 100, Solimar solutions satisfy a wide range of requirements by combining integrated connectivity, data stream transforms and optimizations, document re-engineering/repurposing and sophisticated print queue management with secure web-based document presentment, distribution and tracking.

Experts in legacy and modern data streams, Solimar solutions provide essential infrastructure to a variety of industries including insurance, financial services, banking, pharmaceutical, telecommunications, healthcare, government, education, retail, manufacturing, utilities, distribution and print service bureaus.
