

Solimar® Print Director™ Enterprise (SPDE)

XCHANGE::PDF Conversion Module

Overview

The XCHANGE::PDF module converts mainframe and Xerox LCDS/Metacode applications to PDF files. These files are for use with Adobe® Acrobat® viewing stations, imaging systems, and Internet publishing programs that support PDF. Additional benefits include document reprinting, archiving, proofing, and instant publishing of PDF files on Intranets and the Internet.

PDF indexing integration

When XCHANGE::PDF is integrated with SOLsearcher™ PDF indexing tools:

- Provides automatic indexing of files at production speeds
- Creates an external index file that allows archive systems to search across multiple PDF files

Technical Specifications

- Converts Xerox fonts into Adobe Type 3 fonts for 100% document fidelity
- Supports font substitution with Adobe Type 1 screen fonts for optimized viewing
- Supports flate compression of images
- Supports background fonts and can disable shading
- Supports pre-printed form overlays and full-color pre-printed stock
- Supports and displays color in text and graphics
- Displays ITEXT messages in SPDE
- Supports HOSTCOPY & NT01 processing
- Supports selective report processing for offline jobs
- Supports copy sensitive feed drawer output
- Integrated with the Job Separator module to create multiple PDF files from a single data file
- Emulates Xerox LPS Metacode printers in channel and tape modes & IBM line printers
- Supports Xerox FNT, FRM, IMG, LGO, PDE, CME, and JSLs
- Supports Xerox resources with FILE=() and batch and page-interleaved graphics
- Converts print data and resources dynamically without coding or reprogramming
- Outputs searchable PDF files for viewing with Adobe Acrobat 3.0 or higher
- Supported formats: ASCII, EBCDIC, 3211, 3262, 4245, 4248, 6262, Xerox DJDE/LCDS/Metacode

Components

- XCHANGE::PDF module
- Solimar JSL and FSL compiler

Solimar® Print Director™ Enterprise (SPDE)

Enterprise Output Management Solution

The Solimar Print Director Enterprise is a client-server-based enterprise output management solution designed to improve the performance of production output processes and optimize management control.

Utilizing advanced technology, Solimar Print Director Enterprise combines multi-level security, remote administrator and operator access, event logging and notification, direct device connectivity capabilities, powerful job routing and tracking with industry-leading data stream transformations.

About Solimar Systems, Inc.

Founded in 1991, Solimar Systems, Inc. is a leading developer of enterprise output management solutions for digital document creation, production and distribution. Installed in thousands of sites around the world, including nearly 50% of the Fortune 100, Solimar solutions satisfy a wide range of requirements by combining integrated connectivity, data stream transforms and optimizations, document re-engineering/repurposing and sophisticated print queue management with secure web-based document presentment, distribution and tracking.

Experts in legacy and modern data streams, Solimar solutions provide essential infrastructure to a variety of industries including insurance, financial services, banking, pharmaceutical, telecommunications, healthcare, government, education, retail, manufacturing, utilities, distribution and print service bureaus.
