

Solimar® Print Director™ Enterprise (SPDE)

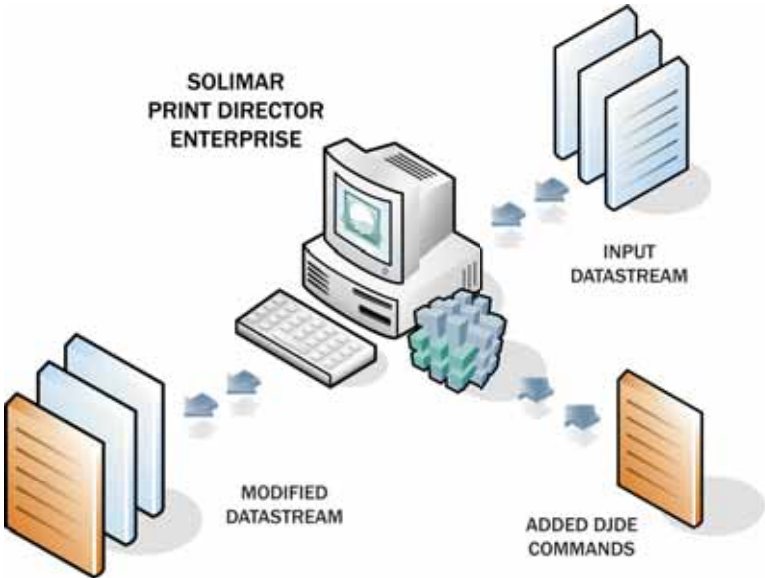

XRocks Printer Controller Utility Module

Overview

The XRocks Printer Controller module drives and controls printing with special commands for Xerox LPS Metacode printers.

The XRocks Printer Controller module generates user defined DJDE and RSTACK commands and downloads resources to the printer's hard drive. DJDE commands are used to control Xerox printer features such as duplex, start command, and feed drawer selection. This module can modify existing DJDEs in the data or generate new DJDE commands to modify how the job is processed by Xerox LPS printers or SPDE XCHANGE:: modules.

Technical Specifications

- Inserts user definable RSTACK records before or after data for report separation
- Generates any DJDE command to modify print data on-the-fly, such as: COPIES=, JDE=, JDL=, FORM=, DUPLEX=, OTEXT=, DEPT, etc.
- Provides a user definable IDEN preamble
- Generates ASCII and EBCDIC DJDE commands
- Enables downloading resources including fonts, forms, logos, images, JSLs, and FSLs
- Supports offline and online resource downloads

Components

- XRocks Printer Controller module
- Included with Base System

Solimar® Print Director™ Enterprise (SPDE)

Enterprise Output Management Solution

The Solimar Print Director Enterprise is a client-server-based enterprise output management solution designed to improve the performance of production output processes and optimize management control.

Utilizing advanced technology, Solimar Print Director Enterprise combines multi-level security, remote administrator and operator access, event logging and notification, direct device connectivity capabilities, powerful job routing and tracking with industry-leading data stream transformations.

About Solimar Systems, Inc.

Founded in 1991, Solimar Systems, Inc. is a leading developer of enterprise output management solutions for digital document creation, production and distribution. Installed in thousands of sites around the world, including nearly 50% of the Fortune 100, Solimar solutions satisfy a wide range of requirements by combining integrated connectivity, data stream transforms and optimizations, document re-engineering/repurposing and sophisticated print queue management with secure web-based document presentment, distribution and tracking.

Experts in legacy and modern data streams, Solimar solutions provide essential infrastructure to a variety of industries including insurance, financial services, banking, pharmaceutical, telecommunications, healthcare, government, education, retail, manufacturing, utilities, distribution and print service bureaus.
