

Solimar® Print Director™ Enterprise (SPDE)

iCONVERT™ Edition

Overview

The iCONVERT Edition of SPDE converts IPDS print streams, reaching 600+ pages per minute, from mainframes, AS/400s and network systems into PCL, PDF, PostScript, TIFF, or pass-through IPDS files for production or distributed printers, archiving systems, or viewing stations. The emulation operates as a "Service" under Windows® 2000/NT, and runs in the background of SPDE. The output print data or files are received by the Solimar print server automatically for data routing and queue management.

Technical Specifications

- Emulates IBM AFP and IPDS printers including: 3800—Supports page rotation and multiple paper sizes, 3812 /3816, 4028, 3287 and 3130/3160 – (Supports most AFCCU IPDS extensions)
- Appears to the host as printer logical units (LUs)
- Configures as SNA or TCP attached printers
- In SNA environments, data received via: Channel (BUS/TAG, ESCON), Token Ring, Ethernet, SDLC & X-25
- In TCP/IP environments, data received via lpr, FTP, or the "brick" protocol
- Mainframe communication is through Windows® 2000/NT TCP/IP stack or MS SNA
- Accepts LU1/SCS (including transparent fields), LU3/DSC and IPDS input data streams
- Converts inline resources and print data dynamically to new PDF
- Outputs to production and distributed printers supporting IPDS, PCL and PostScript
- Converts data to PDF viewable files
- Produces TIFF graphics in viewable or faxable format including: Pack Bits, CCITT Group 3, Uncompressed TIFF and Class-F (fax) output

Components

- IPDS::PCL module
- IPDS::PDF module
- IPDS::PostScript module
- IPDS::TIFF module
- Modules are licensed separately

Solimar® Print Director™ Enterprise (SPDE)

Enterprise Output Management Solution

The Solimar Print Director Enterprise is a client-server-based enterprise output management solution designed to improve the performance of production output processes and optimize management control.

Utilizing advanced technology, Solimar Print Director Enterprise combines multi-level security, remote administrator and operator access, event logging and notification, direct device connectivity capabilities, powerful job routing and tracking with industry-leading data stream transformations.

About Solimar Systems, Inc.

Founded in 1991, Solimar Systems, Inc. is a leading developer of enterprise output management solutions for digital document creation, production and distribution. Installed in thousands of sites around the world, including nearly 50% of the Fortune 100, Solimar solutions satisfy a wide range of requirements by combining integrated connectivity, data stream transforms and optimizations, document re-engineering/repurposing and sophisticated print queue management with secure web-based document presentment, distribution and tracking.

Experts in legacy and modern data streams, Solimar solutions provide essential infrastructure to a variety of industries including insurance, financial services, banking, pharmaceutical, telecommunications, healthcare, government, education, retail, manufacturing, utilities, distribution and print service bureaus.
