# ACCESSIBILITY ENGINE

## SOLIMAR BRINGS ACCESSIBILITY TO TRANSACTIONAL DOCUMENTS

The ability to deliver accessible documents is a growing consideration for many organizations. Solimar supports PDF/UA workflows by enabling organizations to tag transactional documents with accessible elements at the post-composition stage of the production process. Solimar's accessibility solution utilizes powerful indexing templates and an accessibility engine to target and tag data for ingestion into user-accessible technologies that help organizations meet their compliance initiatives.

# PROTECT DATA CONFIDENTIALITY WITH DYNAMIC REDACTION

Removing sensitive data from transactional documents is vital to maintaining confidentiality, supporting compliance initiatives, and protecting recipient privacy. Solimar’s redaction solution dynamically removes content with automated and templated indexing workflows. Content can be completely removed or replaced with alternative content including text, images and/or whitespace.

# ENTERPRISE PRINT & DOCUMENT DELIVERY SOLUTIONS

With more than 45,000 products installed in thousands of sites worldwide, Solimar Systems is a leading provider of document delivery solutions for transactional/POD production printing environments and online web presentment.

Support PDF/UA workflows by tagging transactional documents with accessible elements. The Accessibility Engine targets and tags data for ingestion into user-accessible technologies.

Removes sensitive data from transactional documents, maintaining confidentiality, and supporting compliance initiatives. Content can be completely removed or replaced with text, images, and/or whitespace.

Modular document re-engineering and post-composition solution that can be configured to automate manual processes, enable postal savings, add value to documents, and dynamically modify print data.

Automates output production tasks to support business-critical processes such as external processes & scripts, indexing PDF documents, and executing Rubika® configurations.

Powerful PDF indexing tools that provide methods to quickly design, test and manage indexing templates for data extraction. Works as stand-alone product or with SOLsearcher™ and Rubika®.

Scalable and secure electronic document delivery solution that enables organizations to index, store, search and retrieve large collections of transactional and scanned documents.

## ABOUT SOLIMAR SYSTEMS, INC.

Solimar Systems is a leading developer of Customer Communication Management and Delivery solutions. Our solutions provide clients visibility into their workflows and operations while driving costs down; track the lifecycle of jobs from receipt to multi-channel distribution; optimize and convert data and documents; manage and optimize production printing across facilities and enable secure access and compliance. We also drive value and revenue generating opportunities by adding dynamic, conditional messaging to documents via digital inserts, onserts and augmented reality (AR) experiences. With thousands of clients worldwide, including 70% of the Fortune 100, Solimar has integral, proven IT solutions that have benefited print and data centers for more than 25 years.
