

Powerful and Secure E-Delivery and Web Presentment Suite

CHEMISTRY™ CUSTOMER COMMUNICATIONS
MANAGEMENT PLATFORM.
POWERED BY SOLIMAR™

SOLSEARCHER™ ENTERPRISE – SECURE B2B/B2C WEB PRESENTMENT & INTERNAL REPORT DISTRIBUTION

SOLsearcher Enterprise is a powerful and highly secure electronic document delivery and web presentment suite that enables organizations to effectively index, store, search and retrieve large collections of transactional and/or scanned documents. Designed to complement or replace existing print processes and accelerate decision making, SOLsearcher allows clients to securely access critical business documents and reports instantly via the Web. In addition, its unique email notification system streamlines the distribution of information by informing users when a requested report is available.

Backed by Solimar's renowned Technical Support team, SOLsearcher leverages advanced industry standard technology that includes .NET and Web Services. Typically installed in hours, not months, SOLsearcher provides rapid ROI while supporting a variety of regulatory compliance initiatives.

CRITICAL INFORMATION

Real-time document delivery provides a strong platform to improve critical business processes, increase operational efficiency, and manage with greater agility. By utilizing electronic documents and the web, astute business leaders have experienced increased responsiveness, greater knowledge-worker productivity, and tremendous cost savings. Moreover, they've ensured that informed decisions can be made, allowing organizations to effectively manage their exposure to risk.

SECURE DOCUMENT DISTRIBUTION

Designed to be deployed at the department level or company wide, SOLsearcher is a highly scalable and secure web-based document delivery solution that extends the reach of business communications by providing fast, easy, and secure worldwide electronic document distribution. With an easy to use suite of system management tools and a highly customizable API, SOLsearcher can be seamlessly integrated with existing systems and processes in a matter of hours, not months, resulting in immediate productivity improvements.

STREAMLINE YOUR BUSINESS

SOLsearcher users benefit from a familiar browser-based graphical interface, customizable Inbox, automated email notification, advanced search capabilities, and 100% image fidelity. Organizations benefit by leveraging their existing print infrastructure and business processes to implement a highly secure electronic document distribution solution, providing a rapid return on investment and low total cost of ownership.

REAL-TIME DECISION MAKING

In today's highly competitive global market, the ability to make better and faster business decisions is essential to success. Yet making such decisions involves more than simply providing secure and timely access to critical information. It also requires the integration and management of complex business processes.

FAST, ACCURATE, SECURE

Designed to complement existing printing processes, SSE provides a secure and easy-to-use solution for distributing and accessing critical information via the web. Users can quickly search large amounts of information and display the same document that was previously printed, including identical content, formatting, page boundaries, forms, graphics, and line endings.

CUSTOMIZABLE USER INTERFACE

SOLsearcher includes a multi-language web client and an Application Programming Interface (API), providing organizations with the flexibility to customize the appearance and functionality of the client, including integration with existing portals.

Users can quickly tailor their own Inbox and Search environment to accommodate individual preferences and workflow needs, maximizing productivity. Recurring search operations can be easily saved, and automated notifications established to alert users when critical information is available.

The screenshot displays the SOLsearcher Enterprise web interface. The top navigation bar includes 'Inbox', 'Search', 'Admin', 'Preferences', and 'Logoff'. Below this, a search bar is visible with filters for 'Categories', 'Reports', 'Actions', and 'Selected Reports'. The main content area shows search filters for 'InsuranceLast Name', 'First Name', 'InsurancePolicyNumber', 'Date', 'Est. Total Premium', and 'Phone #'. A 'Search' button is located at the bottom of the filter section. To the right, a results table is displayed with the following data:

	InsuranceLast Name	First Name	InsurancePolicyNumber	Date	Est. Total Premium	Phone #
<input type="checkbox"/>	Adams	Carolyn	157 GJ 0021675901 QCA	4/15/2004	366.00	(212) 555-0778

“At Cathedral, we view Solimar Systems as a strategic partner rather than a vendor.”

**Marianne Gaige
President/CEO, Cathedral Corporation**

FLEXIBLE ACCESS & SECURITY SETTINGS

System security and access rights may be defined for both individual users and specified groups, while document security settings may be implemented at the file, report, document, or even field value levels.

ROBUST SEARCH CAPABILITIES

Rather than re-enter criteria to further refine a search, users can use an intuitive “search within a search” capability to quickly refine a results list. In addition, an easy to navigate results table provides an efficient shortcut to key pieces of data.

OPTIMIZED WEB DELIVERY

Developed with sophisticated communication technology optimized to increase access speed and viewing performance via the web, SOLsearcher can also accommodate users of systems with limited bandwidth.

ACCELERATE INFORMATION ACCESS

Dramatically reduce the time required to receive printed documents by providing immediate “anytime, anywhere” access to critical business information via a common web browser interface. Users can immediately access their information to become more efficient and productive.

LOWER PRINT OPERATION COSTS

Distributing electronic documents can significantly reduce or even eliminate printing-related costs, including hardware costs, maintenance contracts, “click” charges, pre-printed forms, and other printer-related consumables and supplies.

REDUCE DISTRIBUTION EXPENSES

In addition to providing immediate access to critical business information, electronic delivery can reduce or eliminate the labor and distribution expenses commonly associated with paper storage, CD creation, shipping, postage, and courier services.

SIMPLIFY REPRINT OPERATIONS

Why reprocess jobs from the beginning or reprint the entire job when only a few pages are required? A unique sub-setting functionality allows specific pages to be quickly retrieved, accessed, and reprinted as needed.

AUTOMATE BUSINESS PROCESSES

A unique email notification feature supports business process automation by automatically notifying users when requested information becomes available, dramatically streamlining operations, improving time to delivery, and enhancing information workflow.

“SSE is a cornerstone of our eStreamOne solution for online document presentment. Its core platform is reliable and efficient and offers a wide range of features around security and customization.”

**Henry Perez
President, FSSI**

INTEGRATED DOCUMENT DELIVERY SOLUTION

Managing the distribution and retrieval of high-volume transactional documents has never been easier. SOLsearcher specifically addresses a number of challenges faced by organizations needing to distribute communications via documents. SOLsearcher offers clients an integrated Enterprise Report Management solution.

BENEFITS OF ELECTRONIC DISTRIBUTION

IMPROVES DELIVERY OF INFORMATION

- Delivers reports to users ahead of printed documents
- Enables quick and accurate data mining
- Reduces time to market and response times

LOWERS OVERALL DOCUMENT COSTS

- Reduces printing and distribution expenses
- Eliminates wastes: paper, labor, postage
- Removes or lowers cost of physical storage

ENABLES ACCESS TO DOCUMENTS AND DATA

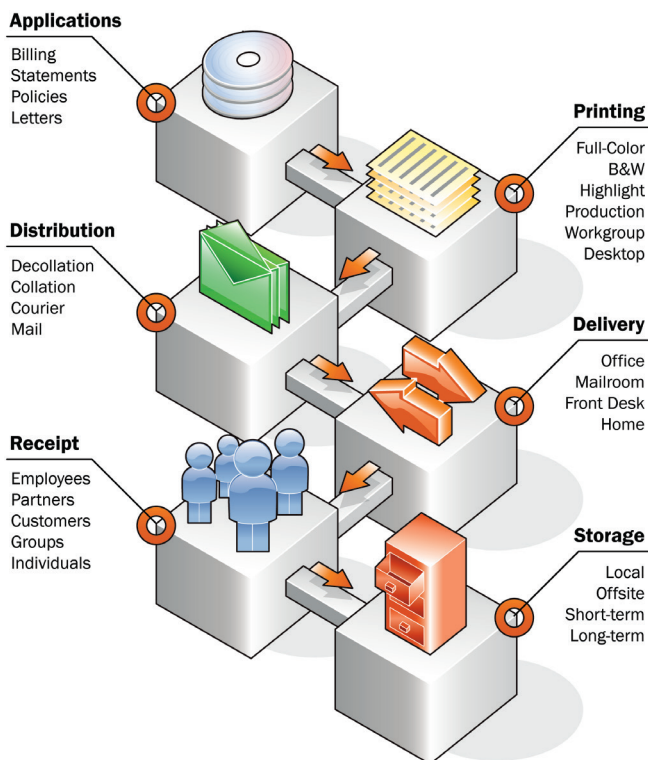

- Provides historical information
- Captures static data i.e. messages and offers
- Increases staff productivity

SUPPORTS SECURITY AND COMPLIANCE INITIATIVES

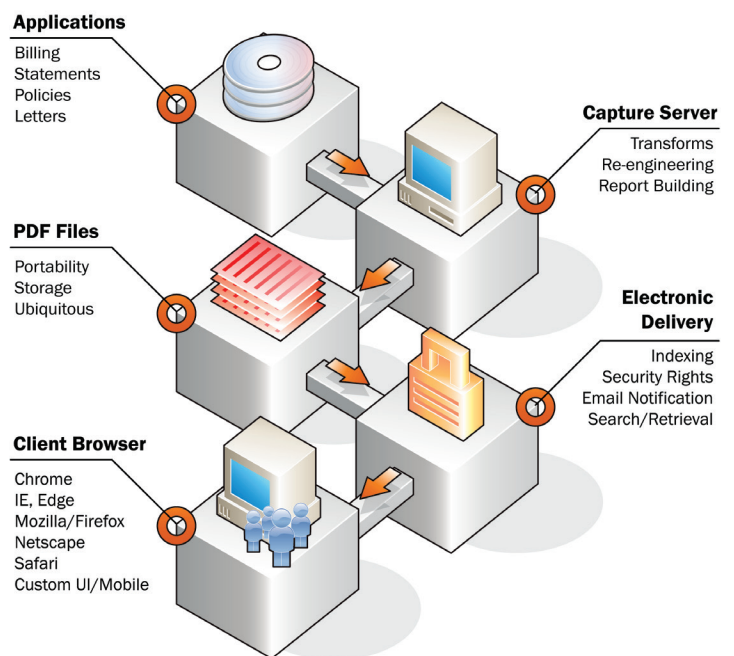

- Supports internal, internet and portal access
- Provides secure access to sensitive information
- Tracks document access and usage

TRADITIONAL PRINTING ENVIRONMENT

ELECTRONIC DELIVERY ENVIRONMENT

WEB PRESENTMENT FOR B2B, B2C AND INTRANET ENVIRONMENTS

REPORT DATA MINING

SOLsearcher Enterprise allows users to export data fields to a database in .csv format. This function reduces accounting errors and enables large amounts of data to easily be analyzed.

CUSTOMER SERVICE

SOLsearcher Enterprise enables call centers to access an exact rendition of the printed document that the customer received. This improves customer satisfaction and empowers the call center to easily recreate documents for print, fax or email.

SECURE REPOSITORY

SOLsearcher Enterprise's central document repository allows information to remain secure, yet accessible. Clients and employees can easily find and view documents online. All document and system access is trackable, which is key to enabling regulatory compliance.

IMAGING WORKFLOW

SOLsearcher Enterprise supports adding scanned documents to the secure repository. The same fields or meta tags that were entered when the document was scanned are used in the online search. Documents scanned to PDF with OCR can be indexed dynamically.

DOCUMENT ASSEMBLY

SOLsearcher Enterprise enables users to select and assemble customer reports across different report files and types. The add-on module can be integrated as an API into websites and web-enabled applications such as internal CRM packages.

RECREATE STATION

SOLsearcher Enterprise often operates as a recreate station when files in the repository are embedded with finishing information. Reports can be selected, ordered, and then sent to a production printer, or to an end-user via local printer, fax server or email.

WEB PRESENTMENT FOR B2B, B2C AND INTRANET ENVIRONMENTS

REPORT DISTRIBUTION

SOLsearcher Enterprise delivers electronic reports dynamically to internal and external user accounts via the inbox feature and/or by sending email notifications of new and requested reports. Users benefit from having immediate access to information and then can print only the relevant page(s) needed.

WORKFLOW ANNOTATIONS

SOLsearcher Enterprise allows for notes to be added to documents or reports that are for public or private use. These annotations are often used in collaboration workflows which improves communications on shared documents.

POWERFUL INDEXING

Easy to use UI to quickly design, test and manage SSE indexing templates, known as SDX files. The indexing tools support the creation of Index, Qualifier, Report and Table objects, allowing users to develop rule-based indexing parameters that ensure only relevant information is captured.

ROBUST MANAGEMENT

The strength of SOLsearcher Enterprise is its sophisticated management and configuration capabilities. Intuitive yet extremely powerful, the System Manager, Application Database Manager and remote Web Admin software modules enable organizations to customize their operating environments quickly and easily.

EASY IMPLEMENTATION

SOLsearcher Enterprise is comprised of several server components and software modules. These components can be distributed across three or more systems as required, providing maximum scalability and redundancy.

CUSTOMIZABLE INTERFACE

SOLsearcher Enterprise includes a multi-language thin client and an API utilizing Web Services, providing the flexibility to customize the appearance and functionality of the client as needed. The customizable Inbox and email alert messaging features ensure immediate access to critical information and notifications.

**APPLICATION BRIEF
DOCUMENT WEB PRESENTMENT**

PRINT SERVICE BUREAU

BUSINESS PROBLEM

- Provide e-Statement delivery for customers' support center
- Payment books
- Statements (financial and mortgage)
- Lease invoices
- Overdue notices
- Access via in-house portal and customer website

ADDITIONAL REQUIREMENTS

- Costs supported by existing pricing structure
- Ability to add new customers quickly without additional staff

ELECTRONIC DOCUMENT DELIVERY SOLUTION

- Provides exact rendition of printed statements
- Single data stream workflow for print and electronic distribution
- Integrates with websites via Web Services API
- Supports external security management including LDAP
- No new staff or technology with minimal effort to customize
- Solution offered as a value-added extra for client retention
- Adds two new clients per month

**APPLICATION BRIEF
CUSTOMER SERVICE AND CALL CENTER**

PUBLIC UTILITY PROVIDER

BUSINESS PROBLEM

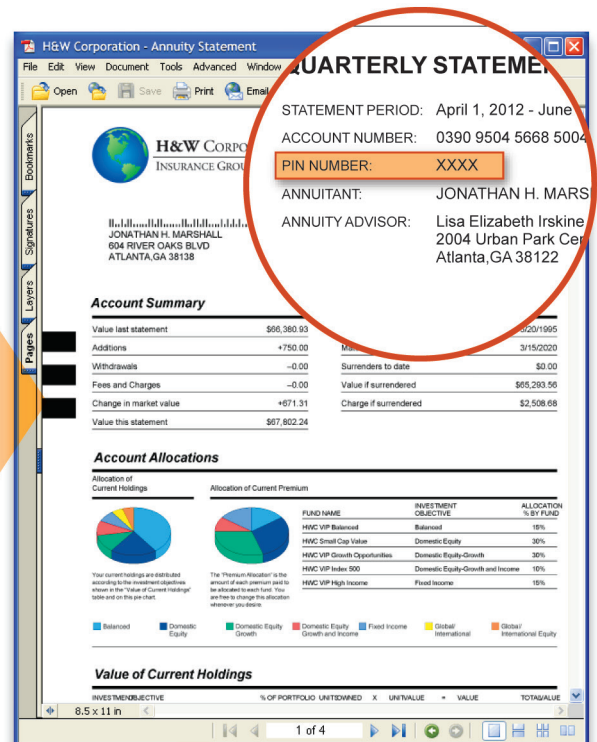

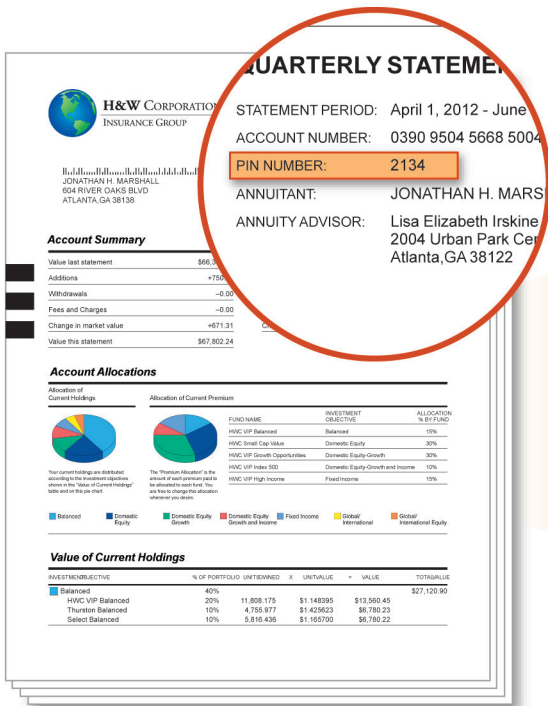

- CSRs had access to data only not actual statements
- Disparate customer service systems
- No online access for customers
- Highly sensitive security needs

ADDITIONAL REQUIREMENTS

- Low total cost of ownership (TCO)
- Easy to deploy and maintain
- Ability to support 2000+ users
- Support for additional applications

ELECTRONIC DOCUMENT DELIVERY SOLUTION

- Enables online access to statements
- Provides exact document fidelity
- Secures customer PIN information
- Integrates documents search and view within existing CRM system
- Controls usage rights based on assigned group
- Scales to support a variety of application types

EASY TO DEPLOY AND MANAGE

SOLsearcher is highly scalable and adapts to both department and enterprise environments, as well as print service providers managing output for multiple customers.

Common SOLsearcher applications include a variety of critical internal reports and high-volume transactional and/or scanned documents, such as invoices, financial statements, policies, and consumer notices.

IMPLEMENTATION

- Customer installable and configurable
- Installation measured in hours, not months
- Client API to integrate with corporate portals

SECURITY

- Centralized system administration
- Configurable at both user and group levels
- Security applied at the file, report, field, or data level

STORAGE

- Employs vendor-neutral ISO 9000 standards
- Resource management optimized for archiving
- Supports ad-hoc inquiries and long-term archival needs

INDEXING AND SEARCHING

- Sophisticated rule-based indexing capabilities
- Designed to support multiple document types
- Unique viewing technologies optimized for the web

ARCHITECTURE

- Modular, enterprise scalable design
- Simple to deploy, manage, and support
- Leverages industry standard technologies

“We are now saving \$50,000 per year in storage hardware costs compared to our previous electronic document presentment system.”

Matrix Imaging Solutions

ENTERPRISE PRINT & DOCUMENT DELIVERY SOLUTIONS

With more than 45,000 products installed in thousands of sites worldwide, Solimar Systems is a leading provider of document delivery solutions for transactional/POD production printing environments and online web presentation.

Database-centric job management system with a web-based interface to drive printers and control Solimar systems to track and monitor job security, routing and device statuses.

Client-server-based output management solution combining integrated connectivity with fast, accurate print stream conversions, and powerful job routing/tracking capabilities.

Modular document re-engineering and post-composition solution that can be configured to automate manual processes, enable postal savings, add value to documents, and dynamically modify print data.

Automates output production tasks to support business-critical processes such as external processes & scripts, indexing PDF documents, and executing Rubika configurations.

Powerful PDF indexing tools that provide methods to quickly design, test and manage indexing templates for data extraction. Works as stand-alone product or with SOLsearcher™ and Rubika®.

Scalable and secure electronic document delivery solution that enables organizations to index, store, search and retrieve large collections of transactional and scanned documents.

ABOUT SOLIMAR SYSTEMS, INC.

Solimar Systems is a leading workflow software provider for organizations worldwide, specializing in production print and digital communications. Incorporated in 1991, Solimar has a strong foundation in enterprise print management, PDF security and industrial optimization, JDF job ticketing, piece level tracking, and visibility dashboards, enabling factory efficiencies.

The Solimar Chemistry™ platform caters to various industries, including print service providers, in-plant factories, transactional and direct mail printers, commercial and industrial printers, and emerging sectors like labels, textiles, and wide format. Solimar solutions seamlessly integrate across software and hardware environments, enabling time and cost savings for our global customers. Explore our published case studies and video testimonials on ROI; many are long-time Solimar Customer Advisory Council members.
