CHEMISTRY™ INTEGRATED WORKFLOW WITH BCC SOFTWARE

Today's transactional and variable data printers need document tracking accuracy throughout production, starting from file receipt and going through the mailing process in order to meet SLA and compliance requirements. Solimar's Chemistry™ platform helps printers do exactly this by tracking jobs from end to end. By integrating with BCC Software, organizations can seamlessly extend job tracking through insertion to physical delivery providing greater visibility and reporting into each job, along each step of the process.

As an integration partner, BCC Software extends visibility and ensures compliance for print centers through postal cleansing and tracking individual mail pieces at critical points in the production workflow. This integration allows production environments to track jobs from the time the files arrive, through printing and finishing and include delivery data when carrier information is available. As a result, organizations can better manage operational performance, grow their business and reduce risk.

TEAM SOLIMAR CAN OFFER YOU:

Online demos of our solution suite & capabilities

Free file testing of AFP, IPDS, Metacode, PCL, PDF, PostScript & VIPP®

Evaluation systems & on-site assessments

FAST-TRACK YOUR ROI!

Our modular solutions are off-the-shelf configurable with intuitive user interfaces. Professional services are available, but not required.

We empower our global clients and partners with 24/7 on-demand training content. Register today at: suo.solimarsystems.com

ABOUT BCC SOFTWARE

BCC Software is the leading postal and presort software solutions provider. With 40 years of industry experience, they are dedicated to ensuring that all of their software products and marketing solutions are always ahead of the curve and compliant with the latest USPS® regulations. From automation that can transform your current operations to expert data quality services that work to maximize your ROI on all campaigns, BCC Software has a solution to fit the needs of your business.

ABOUT SOLIMAR SYSTEMS, INC.

Solimar Systems enables organizations around the globe to onboard, make ready, enhance, manage and deliver print and digital communications. As an early adopter of the PDF output format, our Chemistry™ platform optimizes and drives a variety of print and electronic workflows including transactional and direct mail printing, accessibility, archive services, digital delivery and secure communications. Celebrating 30 years in 2021, Solimar continues to deliver critical infrastructures to the high-volume digital printing industry. Our clients' case studies and testimonials demonstrate our significant ROI and world-class support.
